'High School Musical 3: Senior Year' is great entertainment. Troy, Gabriella, Sharpay and Ryan get to the end of high school together. Now they have some big decisions to make and lots of things to do. This year is full of stress and tension as the characters are preparing for their final exams and are thinking of going to different universities.

Zadanie 3.

Good morning, listeners! It's 9 o'clock and I hope you've already had your breakfast and are looking forward to enjoying the sunny weather. Today I'm out of my London studio and talking to you live from the South-West of England. It's a special day here in Gloucestershire as the local inhabitants are getting ready for the annual cheese-rolling competition. Every May the town attracts thousands of visitors who want to be part of it, both as observers and competitors.

The rules are easy – you need to wait for the block of cheese to start rolling down the hill and then run after it as fast as you can. The winner is the person who reaches the cheese the fastest. It is all a lot of harmless fun, however, there were a couple of injuries reported last year. The contestants were told to be extra careful this time, and let's hope they will. There are four races planned, including one for the ladies. I must say I can't wait to see them!

Zadanie 1.

Have you ever heard of a TV series called 'Dr Who'? The main character – the Doctor – travels in time and experiences a lot of crazy adventures. The series is one of the longest-running in the world. The first episode was shown on BBC television in 1963. 'Dr Who' wasn't very popular at the beginning, but once the young audience liked it, so did their parents, and it soon became great family entertainment.

The series had something for both generations – fun adventures, well-written dialogues, great action scenes and special effects. After years of great popularity it was cancelled in 1989 as there were fewer and fewer people watching it. However, fans of 'Dr Who' convinced the BBC to film it again, and new episodes were shot in 2005. It has been a continuous success since then. So far, 10 actors have played the lead role, recently Christopher Eccleston and David Tennant.

Reading 'The Invention of Hugo Cabret' is like being in a black-and-white movie. Why is that? It's because of the book's unusual use of illustrations. Their author got the most important U.S. award for the book's graphic design. The book tells a story of a boy living with his uncle in a Paris train station. One day his uncle disappears and now the boy has to stay at the station and look after the clocks.
